Tejera Microsystems Engineering, Inc.

FOR IMMEDIATE RELEASE

## TME announces new High Current Ultra-Micro Battery Adapter

---

**Riverview, Florida. - June 9, 2011 -**

Today, Tejera Microsystems Engineering, Inc. (TME), a leading innovator and manufacturer of RC accessories, announced the release of the **High Current Ultra-Micro Battery Adapter**. The new adapter allows you to save time and charge up to 4 High Current Ultra-Micro Batteries simultaneously with any charger that supports 1s (3.7V) Lithium batteries (like TME's Xtrema Charger) via both a standard JST connector or High Current Ultra Micro connector to accommodate a wide variety of chargers. These new batteries are used in the new Blade® mCP X Helicopters.

The adapter connects them in parallel and can accommodate batteries of different capacities. By charging in parallel, the only requirement is that all cells must be near their normal discharged state before connecting together and consequently charging. The user has complete control over the charge rate and will most likely opt for a safe 1 hour charge for max battery life. Easily expands to 8, 12, 16 or more batteries by ganging them together in parallel.

This exciting new product is in stock and ready to ship. TME's part number for the adapter is **XTR-MCPX4**. It will retail for **\$11.99** and be available at [www.TMEnet.com](http://www.TMEnet.com) and hobby shops nationwide.

*Blade® is a registered trademark of Horizon Hobby, Inc. and is used with permission.*
